

LIGHT SWITCH PLATES

Please make sure that you
open or import template files
at 300 DPI.

The finished image size (black dashed cutline) is

If your final product requires printing to the edge after trimming, you **must** extend your artwork to the **red** boundary box for proper bleed. Anything between the dashed cut line and the red bleed line will be trimmed off. The green box and circles represent the switch hole and screw holes. Avoid putting image over these areas.

All text should be kept within the **blue** safety box.

After you've finished laying out your art, you can delete the layer labeled "Delete this layer".
